New Creative MuVo T100 MP3 player

Little flash-drive-style player announced

by Amy-Mae Elliott published on 26 September 2007

Creative has announced the new MuVo T100, that they describe as a "versatile, colourful, and easy-to-use MP3 player".

This USB flash drive-esque offering will come in black, white or vibrant pink.

The USB connectivity means it will plug directly into a PC or notebook with no cables required and is instantly ready to go enabling music to be dragged and dropped straight to it.

The MuVo T100 will be available with either 2GB or 4GB memory and the USB-rechargeable battery claims to give up to 10 hours playtime.

File-wise it will support MP3, WMA, WAV and Audible formats and it offers a Bass Boost button for "extra impact".

Pricing and availability to be confirmed, but with no LED screen or swanky features, we'd expect it to be cheap.
