## Concept workstation gives you privacy

### Protects your personal space

by Amy-Mae Elliott published on 2 November 2007

The Eclipse Office Partitioning System was developed by Marcus Ward Curran to address the issue of privacy and lack there-of in open plan designs seen in workplaces today.

It's a partitioning system that is designed to not only look good but protects "personal space".

The system includes a desk, task chair, expandable hood, integrated speakers, and power - all set on casters for true mobility.
