## iPhone Week: App of the Day - Only2Clicks Visual Bookmarking

View your fave web pages as thumbnails, with two-click access

by Amy-Mae Elliott published on 3 November 2007

The iPhone is a visual beast. The gloriously colourful homepage is testament to that, as is the Coverflow interface and the "visual voicemail" exclusive to the device.

So, this latest web application we're bringing you as a recommended option for your iPhone, extends that kind of ethos.

On Apple's official "approved" list, Only2Clicks gives you visual bookmarking for your new toy.

It lets you organise your frequently visited web sites, such as, ahem, Pocket-lint, for example, in categories, such as news, shop, blogs and iPhone web apps.

Once you've set your faves up, you can access them anywhere on any PC or Mac, iPhone or iPod.

You can them as thumbnails, and then scroll them "visually" before hopping onto your favorite site in only two clicks. Nice, huh?
