iPhone Week: Accessory of the Day - PED3 Stand for iPhone

Gorgeous grip for your gadget

by Amy-Mae Elliott published on 4 November 2007

There's not a lot to write about the PED3 Rotating Stand for iPhone, other than it's one of those peripherals that is so perfectly suited to the product that it actually makes the product itself more desirable.

Other than that, it rotates 360 degrees, can grip the iPhone both vertically and horizontally, offers cable management and costs \$40. Getting an iPhone and not getting one of these stands would be, in our opinion, a crime.
