ToyTi wireless television for tots

Cuddly telly to make 'em even more square-eyed

by Amy-Mae Elliott published on 27 November 2007

"I Do It" has launched its new wireless 10-inch portable TV "ToyTi" into Europe. The ToyTi comes in two parts - "transmission" and display.

Parents can stream programming to their eager (square?) eyed little ones safe in the knowledge that it's safely approved, and the TV looks ultra-friendly'n'fun thanks to the various toy-like furry covers.
