Tiny digital frame launches for £13.99

1.5-inch wonder

by Amy-Mae Elliott published on 29 November 2007

Cirrus Digital has launched a 1.5-inch rechargeable digital photo frame that holds up to 85 photos.

You can create adjustable slideshows of your favourite snaps with an easy to use software package, which resizes your images and speedily transfers them onto the colour LCD display.

Compatible with Windows 98/XP and Vista, the digital photo frame is available in silver and pink and comes complete with a fabric necklace, keychain, USB cable and driver CD with the claims that it's incredibly simple to use.

The Cirrus 1.5-inch rechargeable digital photo frame is a mere £13.99 at www.svp.co.uk.
