Alien-detectin' mobile phone gadget

Do you want to believe?

by Amy-Mae Elliott published on 12 December 2007

If you're bored already of your ghost-detecting mobile phone accessory then why not try this version that specifically searches for Xenomorphs?

Any alien being, or indeed UFO, within the little gadget's radius will be quickly detected and identified.

Available to order direct from Japan now - which only leaves the question - how have we lived without this for so long?
