Case-Mate's leather shuffle case available now

Colourful cow-skin for your littlest MP3 player

by Amy-Mae Elliott published on 23 January 2008

Case-Mate wants to push up your shuffle with their soft touch Italian "pebble stone" leather case.

An impact resistant plastic shell lays beneath, moulded to the shape of the iPod giving you protection but with access to the shuffle's control pad.

And the keychain attachment means you can take your music anywhere you'd like.

Available in red, blue, pink, orange, black and white, it's £7.99, on sale now.
