## ZaNa Design offers wood, flint and amber flash drives

### Tech meets nature

by Amy-Mae Elliott published on 25 January 2008

Manufactured from wood, silver and precious natural materials, ZaNa Design offer flash drives with a difference.

Exotic Merbau wood is combined with silver and amber or striped flint in these hand-made USB offerings that come in 1GB or 2GB varieties.

Expect to pay upwards from around 45 euros, available now.
