£10,000 MP3 Player for the cash rich

Only comes in 2GB capacity however

by Stuart Miles published on 7 February 2008

If you're worried that your MP3 player is looking a little un-bling then you need to do what one Russian-Canadian billionaire has done and commission your own to be made.

The TrekStor i.Beat Organix Gold MP3 player is a 2GB player priced at just over £10,000 and is cast in 18 karat gold and adorned with 63 1-karat diamonds.

If that wasn't enough, the player is also embellished with a small chain that includes aquamarine gems.

According to the company, jewellers Wenthe in Mannheim, Germany, put over 100 hours of painstaking handiwork into the exquisite gadget.

Understandably they don't carry them in stock, however are happy to make one to order.
