Verbatim launches new mouse series

Laser and optical, wired and wireless

by Amy-Mae Elliott published on 15 February 2008

Verbatim has launched a new mouse series. The company says the new laser and optical mice function precisely, quickly and reliably and are stylishly designed.

Ergonomic functionality means they can be used by left- or right-handers and are said to use the latest optical technology. The new Verbatim Mice are now available and cost between £6.99 and £24.99.

The new series comprises of a Laser Mini Travel Mouse with two buttons and scroll wheel, retractable cable, laser sensor, 800/1600dpi resolution, available in black for £9.99.

The Wireless Optical Travel Mouse has two buttons and scroll wheel, is wireless on the 2.4GHz frequency, has an LED sensor, 1000dpi resolution, comes with two rechargeable NiMH AAA batteries, boasts a storage compartment for the wireless USB receiver inside the mouse, also has a USB cable and comes in black for £17.99.

Then there's the programmable, with 48 functions, Optical Desktop Mouse with five buttons, an LED sensor with 1000dpi resolution that comes in black or blue for £6.99.

The Laser Desktop Mouse has two buttons and scroll wheel, cable, laser sensor, 800/1600/2000dpi resolution, in black or blue for £17.99.

Finally the 2.4GHz Wireless Laser Desktop Mouse boasts five buttons, is programmable with 48 functions, has a laser sensor, 1000dpi resolution, two rechargeable NiMH AAA batteries, is offered in black or blue, and is complete with USB receiver and USB cable for £24.99.
