## GEAR4 launches AirZone FM dock

### Transmit your toons

by Amy-Mae Elliott published on 18 March 2008

GEAR4 has launched the AirZone FM dock.

Compatible with all iPods with a dock connector, the AirZone FM Dock is an FM transmitter which allows you to play your iPod content through any FM radio.

Boasting a slim design that features a back-lit LED screen for easy viewing, four adjustable preset buttons and supports stereo sound with full bass, the unit draws power from the iPod so needs no batteries.

The AirZone FM Dock features a bandwidth of 87.5-108MHz and can be used with the iPhone - when the phone function is turned off.

Priced at £19.99, the AirZone is available from [www.gear4store.com](http://www.gear4store.com) and high street resellers.
