## VIDEO: Onyx Liscio mobile phone

### Quick review in video

by Stuart Miles published on 7 April 2008

The Liscio will work on tri-band GSM 900, DCS 1800 and PCS 1900 networks.

It has a 1.10in OLED full colour display, which delivers a resolution of 96 x 96 pixels with 65k colours.

The phone, which is designed by the team at Onyx Innovation, is 90 x 35 x 17.8mm and weighs 60g.

You can chat away for up to 3 hours each charge, though the phone will last up to 200 hours on standby.

It has a 128MB built-in memory but is also compatible with microSD memory cards up to 1GB in size.
