## LG launches 22-inch 10,000:1 DFC monitor

High contrast ratio model joins 19-incher

by Amy-Mae Elliott published on 8 April 2008

LG has announced the launch of the W2252TQ, its first 22-inch widescreen monitor with an industry leading 10,000:1 Digital Fine Contrast ratio (DFC) when set to "Movie Mode".

Powered by LG's picture enhancing chipset, F-Engine, this new LG monitor claims to boast the best image definition and colour reproduction available today.

Encased in a black glossy curved frame, an electric blue power light adds a design element to the display.

Key specifications of the W2252TQ monitor:

- 10,000:1 DFC (when in F-Engine "Movie Mode")
- 2ms response time (grey-to-grey)
- 1680 x 1050 resolution
- 300 nits brightness/16.7cd/m2
- 170 degree viewing angle
