WEBSITE OF THE DAY - swisspicturebank.com

Trust the Swiss to keep your images
safe from harm

by Ian Hughes published on 14 April 2008

If you absolutely, positively have to keep something safe, who do you give it to? The Swiss, of course.

They have been the trusted custodians of people's valuables for years and what could be more precious than memories?

Swiss Picture Bank is an image storage facility unlike any other. Your images are uploaded to their servers and then cloned for redistribution across a network of secure servers.

These can be accessed from anywhere in the world and because there are several copies of each image, you'll never lose one.

Naturally, this does come at a price, but you might be surprised at how affordable it is.

And like I said: what price do you put on your memories?
