JWD TFT Screen MP3 Radio unveiled

Isn't that a mouthful?

by Katie Scott published on 30 April 2008

The company may be an unknown but the concept is rather nouvelle.

The 2.0-inch TFT screen MP3 Radio + FM is an alarm clock, radio, has a built-in speaker, and a 1GB storage capacity, as well as MP3, WMA, and AVI video support.

The built-in radio offers an FM recording function and can store 20 radio stations pre-sets.

The manufacturer, JWD, adds that you can also expand the memory capacity using the SD/MMC slot.

The price is \$88, which is around £45 at our rather good exchange rates.
