More poker chip flash drives launch

Ace?

by Amy-Mae Elliott published on 30 April 2008

At first glance the Poker Mate range looks like ordinary poker chips, but if you look more closely you'll see the flash drive bit pulls out from the side of the chip, revealing cunningly disguised USB storage.

From around a tenner for the 1GB version, the drives are on sale now at the likes of Maplin and PC World and other online electronics emporiums.
