## Squish satellite receivers available

### Disguise your dish

by Amy-Mae Elliott published on 6 May 2008

Suitable to receive Sky and of-the-moment Freesat broadcasts, Squish dishes are an alternative to your bog-standard satellite dishes.

Thanks to the bespoke "sqishoflage" stickers available, a squish is said to be ideal for areas sensitive to planning restrictions, coastal towns where dishes are prone to rust, or just 'cos you want something a little more design-led.

Squishes are from around £150, plus £25 for a sticker, available now.
