Killzone 2 delayed

Pushed back to 2009

by Stuart Miles published on 7 May 2008

Gamers keen to get playing the highly anticipated Killzone 2 on the PS3 will have to bare some bad news. Sony has said that it will not be releasing the game until February 2009.

The move means that Resistance 2, another big first person shooter from Sony, will have a free run in time for Christmas on the PS3 without having to share the limelight, however it will still have to compete against Microsoft's Gears of War 2 on the Xbox 360.

The game was originally planned to be released sometime in September this year, however David Reeves, SCEE CEO made the comments about the delay at the company's PlayStation Day in London.

Killzone 2 is a hard sci-fi first-person shooter for the PlayStation 3 developed by Guerrilla Games.
