Ubanana uCan waterproof MP3 player goes on pre-order

World's smallest

by Amy-Mae Elliott published on 14 May 2008

Ubanana's uCan is a waterproof MP3 player that fits neatly around the back of your head for an all-in-one, no cables or cases solutions for aqua-friendly tunes.

The clever solution claims to be the world's first and smallest fully integrated waterproof MP3 player.

Angled as for general sports use as well as for swimming, the gadget is waterproof down to 3 metres and floats for "easy retrieval".

Offering a 1GB memory, the device can be juiced for 15 hours of playback and supports MP3 and WMA files.

Not actually shipping until July, the uCan is available to pre-order now at a cost of 99 euros - about £79.
