VIDEO: The Sony house of the future

Gadgets and gizmos from Grand Designs Live

by Katie Scott published on 16 May 2008

We took a wander around Sony's concept house of the future - the centrepiece of this year's Grand Designs Live show in central London.

So what will you find in the eco- and cook-friendly kitchen of the future? And will innovation affect house design as space becomes the premium especially in our cities?

Check out our latest episode either by hitting the arrow button above or the link below which will take you to our very own IPTV channel, Megawhat.tv, where you can take a peek at this latest show, our daily news roundups, quick reviews of the hottest gadgets on the market, insider tips and so much more.
