Canadians nobble new LG phones

The Vu and the Vantage

by Katie Scott published on 22 May 2008

Those lucky chaps on the other side of the Atlantic are getting two new LG mobiles.

The Vu, better known as LG-GU920, is already available to AT&T subscribers but is now coming to Bell Mobility customers in Canada as is the Vantage, also called the LG830.

Spec-wise, the Vu has a 3-inch touchscreen, a 2 megapixel camera, Bluetooth, MicroSD, and MediaFlo for TV on the go.

The Vantage has a 2.6-inch touchscreen with retractable keyboard, a 3 megapixel camera, and bluetooth connectivity.

Girls with shiny, white teeth not included.

Meanwhile - over in the UK - orders are now being taken for the LG Secret, a carbon-fibre, shiny black addition following on from the Shine and the Chocolate, which was launched in Europe last month.
