## VIDEO: Rock Band on Xbox 360

### Clash classic brutally murdered by Miles

The eagerly awaited Rock Band launches as an Xbox 360 exclusive tomorrow and helping you decide whether or not to fork out the £130 for the system is the latest Megawhat quick review.

Pocket-lint's resident rock god (snort!) Stuart Miles had a full hands-on with the new game - all captured for you in wonderful technicolour video - and sadly, considering Miles' vocal talents - full sound too.

Cobbling a quick crew together (that's Pocket-lint reviews ed Chris on the gee-tar) Stuart's claim that his only capabilities with rhythm is that he can spell the word turn out to be all too true...

If you have even a fleeting interest in the game then we recommend you give the three-min vid a spin, but, for the sake of your's (and anyone else around you's) ears may we suggest keeping the volume to a moderate level. Very moderate, in fact. Like off.
