Bluetooth headset with FM radio launches

Musical mobile accessory

by Amy-Mae Elliott published on 3 June 2008

Apparently in response to market demand for such a device, Brando has launched a Bluetooth headset with FM radio, the BTM-118.

As well as Bluetooth 2.0 hook up with your mobile, the BTM-118 is equipped with auto-searching radio station function and an eight station pre-set.

Complete with LCD screen, this somewhat chunky clip style headset with built-in microphone gives you up to 12 hours of radio and up to 10 hours of talk time. \$53.00, available now.
