Toy car mobile phones

Top gear

by Katie Scott published on 6 June 2008

You would get some seriously strange looks if you actually whipped out this phone in a meeting.

Your colleagues would no doubt think that the stress of home life was getting just too much and you had managed to pick up little Tommy's Corgi car instead of your mobile, and had been talking into it all morning unawares (happened to us all).

But no - you are just a car fanatic. going through a second childhood and love the idea of strolling down the street talking into what is, essentially, a toy car.

At least the models are reasonably posh.

You can choose between a BMW and Audi.

The Audi comes in white, while the BMW comes in black.

Both feature a touchscreen, a 1.3-megapixel camera, an MP3 player, 3GP and MP4 support, Bluetooth and 1GB of memory.

The phones cost \$160 each.
