Aigo launches digi-cam MP3 playing sunglasses

That's convergence

by Amy-Mae Elliott published on 9 June 2008

These multi-tasking sunglasses not only offer Oakley-Thump-esque MP3 playing abilities - pumping the 3D stereo sound right into your lugholes - but double as a digital camera.

The lens for the cam functions is built right into the frames so one press of the remote control grabs what you are seeing as a 1.3-megapixel, 1280 x 1024 digital image.

Available with 1GB or 2GB of internal memory, pricing and availability has not yet been revealed.
