## Doro upgrades mobile phones for "seniors"

Colour screens and text messaging.  
Welcome to 2008, gramps...

by Amy-Mae Elliott published on 11 June 2008

Doro has launched two new GSM mobile phones specifically designed for their simplicity and ease of use, the Doro HandleEasy 328gsm and 330gsm.

The company says that the new products are in response to the "burgeoning" seniors' technology market for mobile phones with clearer displays and large, well defined buttons.

The HandleEasy 330gsm is easy to use with large buttons and a high-contrast colour display. Features include a text messaging function, FM radio, torch, vibrating ringer and a speakerphone function.

The HandleEasy is an upgraded version of the Doro HandleEasy 326gsm model now with a directory with room for 100 names and numbers, a clear display and the ability to receive text messages.

The 328gsm is £99.99, available in black and white and the HandleEasy 330gsm is £129.99 in black lava and pearl white.
