## Macally IceCam 2 available from AM Micro

Ice, ice, baby

by Amy-Mae Elliott published on 18 June 2008

AM Micro has announced the immediate availability of the IceCam 2 from Macally.

The IceCam 2 is a USB 2.0 webcam with built-in microphone, and is "truly" plug and play.

As an UVC standard compatible webcam, it doesn't require any additional software and is immediately recognised by the computer.

The Macally IceCam2 has an adjustable focus lens with a resolution of 640 x 480 VGA and a microphone for video calls in applications such as iChat and Skype.

The Macally IceCam2 works with Yahoo! Messenger, aMSN (Mac only) and Live Messenger (Windows only) as well.

If this all sounds good, then it's available now for £19.95 via AM Micro.
