InFocus launches X10 Full HD projector

1080p for £1099

by Amy-Mae Elliott published on 18 June 2008

InFocus has introduced the X10 Full HD 1080p projector to the UK at the "unbelievably" low price of £1099.00.

Claiming a sleek, low-profile design and ease-of-use, from any Full HD source (there's two HDMI 1.3 inputs) the boast is that the X10 will ensure that film and gaming enthusiasts see the detail of 1080p video entertainment magnified on the big screen.

Armed with DLP DarkChip1 technology with BrilliantColor from Texas Instruments, the InFocus X10 full HD 1080p projector offers a native 2500:1 contrast ratio which can be boosted to a maximum of 7500:1 using the iris.

With the video optimised brightness of 1200 Max ANSI lumens, InFocus says that the X10 is bright enough to deliver film-standard, D65K colour accuracy in nearly any home theatre on screens up to 4 metres wide.
