Four-port hub with light launches

Useful USB

by Amy-Mae Elliott published on 23 June 2008

Arguably not the prettiest of peripherals, this four-port USB hub with notebook light will no doubt appeal to some.

Complete with a clip to attach it to your laptop, the light swivels 180 degrees for keyboard illumination, or can be turned off leaving the four-port hub. Available now it's \$29.90.
