## Macally PowerTune portable speaker/charger

### Four in one iPod accessory

by Katie Scott published on 27 June 2008

Macally's PowerTune is a portable speaker that not only also acts a battery charger, but doubles as a protective case and a stand for your precious pod.

Designed for the iPod Classic and 5th generation iPod, the PowerTune comprises a speaker system with two built-in 500mW speakers with volume control.

And it will also recharge your iPod's battery from power drained from a USB port.

The PowerTune has a \$39.99 price tag, which is around £20.
