## U-Mate Mangekyo Kaleidoscope Projector

A thing of rare beauty (but only available in Japan)

by Katie Scott published on 27 June 2008

U-Mate Mangekyo Kaleidoscope Projector is a curvaceous wonder of home cinema styling.

Priced \$169.99 but sadly only available in Japan, it has a round body allowing the user to change the angle of the projecting beam through 360 degrees.

There are a selection of different projecting modes, which users can select on the front panel, and the image sharpening tool is also on this panel.

It is 186 x 138 x 138mm.

Please, please bring it to the UK Mr Manufacturer.
