Classic retro radio launches

Tune in to the Eighties

by Amy-Mae Elliott published on 2 July 2008

You've got your dark wood, your black plastic and your knobs and dials rather than LCD displays and backlighting.

This "Classic" radio from Gadget4All will take you right back to the 80s with its retro looks - it's just down to you to dial into suitably old skool tunes.

Available now, it's on sale for \$45.
