Brunopasso PD-1 espresso machine

A work of art that also delivers a steaming cuppa

by Katie Scott published on 7 July 2008

Designed by Tadahito Ishibashi for Japanese retailer deviceSTYLE, the pod-esspresso machine Brunopasso PD-1 is rather lovely looking.

1960s sports cars have obviously influenced the design, which includes a gearshift-like the handle crafted in beech wood, and the two gauges.

It is available now for SEK 4995 (nearly \$850).
