## New MacBook Pro design leaked?

Anonymous photo revealed aluminium casing

by Amy-Mae Elliott published on 7 July 2008

This spy shot is a possible new case design for the MacBook Pro, according to Chinese blog Apple Pro.

Showing a MacBook Air-esque casing, it's said the keyboard will also follow in the Air's design and that the Apple logo will not be backlit, something that, if true, will no doubt be unpopular with fans.
