Black And Decker Travel "Cooler, Warmer, Freezer" launches

Hot and cold food and drink in your motor

by Amy-Mae Elliott published on 22 July 2008

The Black & Decker Travel Cooler, Warmer and Freezer can cool food and drink to 27 C below ambient temperatures or warm it to 50 C.

The model has a nine litre capacity, is fitted with a mat that creates a freezer compartment and ice tray and it also has a dual drinks can holder.

With a compact design, and a carry strap, the device is powered through the 12 volt DC supply but is capable of detecting your vehicle's battery charge status and will auto shut off to prevent draining the battery.

Designed for road warriors, camping trips or just picnics, the gadget is on sale now for £70.
