Firebox launches MyTunes MP3 Amp

Rock'n'roll

by Amy-Mae Elliott published on 31 July 2008

The MyTunes MP3 Amp is a 5 watt speaker that resembles a traditional guitar amp, with classic looks - albeit in miniature.

It can be powered by 3 x AA batteries, or via USB with the included cable and offers volume, bass and treble dials.

Measuring a mini 12 x 9.5 x 8.5cm, it's available now from Firebox for £19.99.
