Have your very own ATM at home

(But you don't get anything for "opening" an account)

OK so you have to keep it stocked with cash for it to work, and you don't get an overdraft but this is a serious alternative to queuing behind hundreds of other people on a packed highstreet to get some cash.

The ATM Bank is a new piggy bank concept, which keeps tabs on how much money you have taken out and deposited.

And is safe from raiders (like your student baby bro who is permanently broke) because you have to use a card and pin number to get money out - just like a proper cash machine.

It costs £25.
