Buffalo unveils upscaling DVD drive

480p to 1080p

by Katie Scott published on 7 August 2008

Buffalo has added the new DVD super-multi drive to its range.

The main boast for this new piece of kit is its 1080p upscaling function.

The DSM-SL20U2 also allows you to burn DVD±R at 20x, DVD+RW at 8x, and DVD-RAM at 12x.

It will be available at the end of this month for 85 Euros.
