Palm Treo Pro - pics leaked

Isn't she lovely

by Katie Scott published on 15 August 2008

We knew a new Palm Centro was coming out mid -September but to keep you Treo fans happy in the meantime - feast your eyes on this - the Treo Pro.

OK so it's just pics at the moment but doesn't it look lovely with its glossy white and black design.

We don't have any specs as yet but judging by the picture on the screen in the screen shots, it looks like its going to be running Windows Mobile.

We will keep you posted.
