Portable power station for iPhone 3G debuts

Charge on the go with Brando

by Katie Scott published on 18 August 2008

For \$38, you need never be out of charge again with your iPhone 3G.

The Brando iPhone 3G Portable Power Station does what it says on the tin - you charge it up before you head out and then if your phone is running low on battery life, you just connect it on.

It weighs 95g.
