## VIDEO OF THE DAY - Robot solves Rubik's Cube

Rubik's Cube ain't so hard. If you're a robot anyway...

by Ian Hughes published on 20 August 2008

When I first saw this clip, part of my childhood died. I always thought that those smug gits who could actually finish a Rubik's Cube (without levering the squares out with a screwdriver) were freaks of nature.

Turns out that there is a system, as this clip of a robot solving the timeless puzzle proves.

And yes, I do hate the robot tooÖ
