Chordette Gem brings Bluetooth to your Hi-Fi

Plus USB port to connect your stereo to your PC

by Katie Scott published on 21 August 2008

Not only is the Chordette Gem useful but it comes in lots of different colours, which is always nice.

This dinky device basically links up to an ordinary Hi-Fi system to bring it Bluetooth capabilities (A2DP) but also has a USB port so you can also then connect your music system to your computer.

But for £399, this little gem is quite pricey.
