Star Wars fans get mini lightsabre

Plug into your USB port and the force will be with you

by Katie Scott published on 22 August 2008

Work's getting a bit dull, your boss has disappeared to the pub, so what better time for a Star Wars style showdown.

Plug this \$45 Star Wars Lightsabre into your USB port, and not only do you get a show of lots of pretty lights, but then, once it's charged, you can challenge one of your colleagues from "the dark side" of the office to a battle.

Hours of fun it is...
