## Trident Icenic eco car that goes and goes

2000 miles on one tank of fuel

by Katie Scott published on 26 August 2008

It's curvaceous, luxurious and isn't going to attract steely glares from the eco brigade, because the Trident Icenic, as well as being very fast, can cover 2000 miles on one tank of fuel.

It is powered by a Duramax turbo diesel engine with 550 horsepower at 3800rpm, which drives it to speeds of over 200 miles per hour.

And it can go from 0-60mph in less than 4 seconds.

Designed in the UK by Trident Vehicles, the car has been making appearances in the press for years, but the company is now looking for investment to bring the eco, super motor into production.

The company is hoping to make 500 and each will have a price tag of £75,000 (\$150,000), so mere pocket money.
