Miele refines the words "big fridge"

IFA 2008: Big enough to fit a couple of small children in

by Stuart Miles published on 29 August 2008

If you think those American fridges you see in Comet and Curry's are big you haven't yet seen this fridge.

On show on the Miele stand at IFA in Berlin, the fridge, which sports the company's Master Cool system (basically a system that allow you to have four independent cooling zones within the fridge) was to put it bluntly, massive.

The fridge freezer combo looks like it would take some amount of food shopping to fill it up. Just check out the size of it compared to that guy standing in the doorway.
