VIDEO: Sony Bravia Z4500

IFA 2008: Hands on with the new range from Sony

by Stuart Miles published on 29 August 2008

Way back in May, Samsung unveiled to the world the first ever LCD panel that could deliver content at an image-driving speed of 240 hertz.

This is double the rate of current gen LCDs.

Does it look good? We grabbed some video of the new TVs at IFA in Berlin to find out.
