## Orange launches SIM only for business

From £15 a month

by Amy-Mae Elliott published on 2 September 2008

Orange Business Services has launched a set of SIM only tariffs for business customers.

Orange says the new options are designed to give business customers a more flexible way to join Orange without the need to purchase a new handset or sign up to a long-term contract.

Priced from £15 a month, business customers will receive 300 inclusive minutes and 50 inclusive texts.

Sharer SIM only options start at £45 a month including 1000 talk plan minutes with international outbound calls are included in all tariffs.

The new SIM only tariffs are offered in addition to the business packages Orange Solo, Orange Venture and Orange Momentum.
