## GETAC B300 rugged notebook launches

For salty sea dogs

by Amy-Mae Elliott published on 2 September 2008

GETAC has launched yet another fully rugged notebook, the B300, that has been designed to resist salt erosion in and around oceanic and coastal environments.

Aimed at folk in the military or coastguard types, the machine offers the usual tough-as-GETAC goodness in addition to meeting "MIL-STD-810F 509.4" thanks to a special coating that makes it resistant to the corrosion effects, electrical effects and physical effects of salt.
