Sony A900 to be announced September 9th?

Tipster gives the heads up

by Verity Burns published on 4 September 2008

Rumours on the net are suggesting that Sony's latest DSLR, the A900, will be announced worldwide on 9 September.

The news came from an anonymous tipster, who said that Sony itself has told him that this would be the case. Apparently this tipster has provided pretty solid information in the past, but wishes to remain anonymous. A mole from within the Sony camp, we wonder?

Certainly we think we will hear plenty more on this release before Photokina, 9 September or not.
